

HORIZON VISITS TAWAM HOSPITAL

14th July 2013

A group of Horizon staff visited the pediatric Hematology and Oncology section of the Tawam Hospital in Al Ain. The visit was part of a community outreach program that the Academy has initiated. The team, comprising of volunteers from the training and admin departments mingled with children undergoing cancer treatment at the hospital and presented them with gifts.

The volunteers stepped up and displayed a sense of social responsibility that they hope will spread and encourage social responsibility and care for the sick in our community.

The Division of Hematology/Oncology is one of the largest divisions in the Department of Pediatrics at Tawam Hospital; it provides a diagnostic service and specialist care for children < 15 years of age with cancer (pediatric oncology), non-malignant blood diseases (pediatric hematology) and follow up of haematopoietic stem cell (blood and marrow) transplantation.

Apart from enhancing community relations the outreach program is aimed at bringing to the forefront worthy causes that we can all get involved
